Holy Ghost Chess Club goes Hi-Tech

Thanks to the generosity of the parents and school, HGS now has a state of the art chess club. The club of approximately 25 members now has the option of competing on regular chess boards or on laptop computers. Mrs. Jackie Mitchell, chess club sponsor, tells us they now have Chessmaster: Grandmaster Edition software for each of the 20 laptops in the St. Mary laptop computer lab. The Grandmaster edition offers new and exciting ways to both play and learn chess. "The students love it!" Mrs. Mitchell says. "It is truly amazing!" The software has animated boards and pieces that talk and cheer the students on. They can play against each other on different laptops or even watch a game between friends from their own laptop. There are also options to teach as well as challenge chess playing skills. However, the absolute best part according to Mrs. Mitchell is the Christian fellowship fostered through the Holy Ghost Chess Club.
